FIZAN

MADE IN ITALY SINCE 1947

Domenico Fincati ha fondato Fizan nel 1947 ed è stato il primo al mondo a produrre bastoni da sci utilizzando l'alluminio. L'azienda ha le sue radici in Italia, ad un'ora da Venezia, dove la produzione 100% Made in Italy permette un controllo completo e costante su tutti i prodotti. I processi produttivi sono conformi a tutte le normative europee circa il divieto di utilizzo di sostanze dannose.

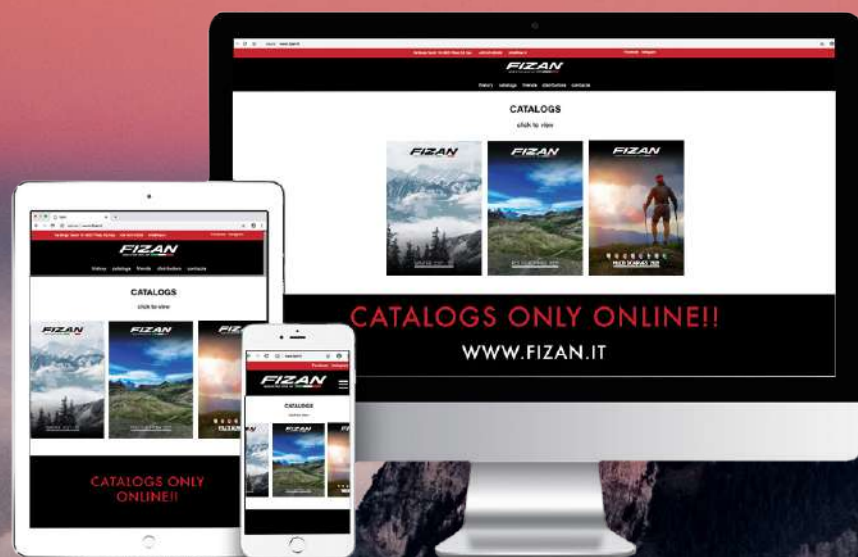

Domenico Fincati founded Fizan in 1947 and was the first in the world to produce aluminum ski poles. The company is situated in Italy, one hour from Venice, where 100% Made in Italy production is a complete and constant control over all products. The production processes comply with all European regulations regarding the prohibition of the use of harmful substances.

ECO-FRIENDLY

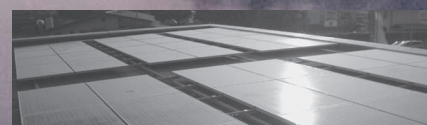

In un'ottica di sostenibilità Fizan non stamperà più nessun catalogo, riducendo l'utilizzo della carta, per passare da un catalogo cartaceo ad uno digitale. I cataloghi saranno facilmente accessibili dal nostro sito Web con un semplice clic. Notizie e aggiornamenti saranno disponibili attraverso i nostri social network.

As part of the Fizan drive to be even more green, we will no longer produce a printed catalogue. This has been replaced with a digital catalogue which is easily accessible from our web site by a simple click. News and updates will be available through our social networks.

Fizan riduce l'impatto ambientale con imballaggi 100% riciclabili, e composti da materiale proveniente da foreste gestite in maniera responsabile e sostenibile. Gli inchiostri utilizzati sono ad base d'acqua (non tossici). Ogni singolo articolo prodotto è facilmente smaltibile per essere riciclato.

Fizan reduces the environmental impact with 100% recyclable packaging, and composed of material from forests managed in a responsible and sustainable way. The inks used are water based (non-toxic). Every single item produced is easily disposable for recycling.

Da quasi 10 anni Fizan ha investito nell'impianto fotovoltaico diventando così, autosufficiente per circa il 60% del proprio fabbisogno ed evitando l'emissione annua di circa 25.000 kg di CO2.

For almost 10 years Fizan has invested in the photovoltaic system thus becoming self-sufficient for about 60% of its needs and avoiding the annual emission of around 25,000 kg of CO2.

ALLUMINIO

Fizan utilizza solamente le due migliori leghe nel mercato: 7001 e 7075. Questi due materiali ci permettono di poter lavorare con spessori sottili ma resistenti.

ALUMINUM

Fizan uses only the two best alloys on the market: 7001 and 7075. These two materials allow us to work with thin but resistant thicknesses.

SISTEMA DI BLOCCAGGIO ESTERNO

Il sistema di bloccaggio Lever è molto intuitivo ed offre un'alta tenuta grazie alla chiusura in alluminio. Le sue dimensioni ridotte mantengono un ottimo bilanciamento del bastone durante il trekking.

EXTERNAL LOCKING SYSTEM

The Lever locking system is very intuitive and offers safe and secure tightness thanks to aluminium closer. The reduced dimensions keeps a perfect balance of the pole during all aspects of trekking.

PASSAMANO

Nel trekking viene sempre privilegiata la leggerezza ed il comfort, per questo motivo anche il passamano è reso confortevole e resistente grazie all'utilizzo di materiali pregiati.

STRAP

In trekking, lightness and comfort are always privileged, which is why the handrail is also made comfortable and resistant thanks to the use of refined materials.

TREKKING

MISURE LASER

Fizan è l'unico produttore ad utilizzare il laser per segnare la regolazione delle misure nel bastone telescopico. Questo processo garantisce una resistenza illimitata durante l'utilizzo.

LASER SIZING MARKS

Fizan is the only producer to use the laser to mark the setting of the measurements in the telescopic poles. This process guarantees unlimited resistance during use.

SISTEMA DI BLOCCAGGIO INTERNO

Il sistema di bloccaggio Flexy mantiene un bilanciamento ottimale del bastone. Il perno in alluminio ed il suo espansore Delrin (by Dupont) garantiscono una tenuta superiore ai 100 kg.

INTERNAL LOCKING SYSTEM

The Flexy inner locking system is made with an aluminum pin and Delrin (Dupont material) expander. This assures a safe and constant tightness of more than 100kg (220 pounds) during use.

PUNTA

Fizan propone due diverse tipologie di punta: una in acciaio ed una in metallo duro che assicura resistenza e durabilità nel tempo.

TIP

Fizan offers two different tip types: one in steel and one in carbide that ensures strength and durability over time.

DESIGN

Grazie ad una tecnica unica nel suo settore, Fizan riesce ad ottenere una elevata risoluzione grafica nei suoi prodotti. Le grafiche vengono effettuate da uno studio grafico interno nell'azienda.

DESIGN

Unique and advanced technology, Fizan provides exceptional high resolution graphics of products. The graphics are made by an internal graphic studio in the company.

MANOPOLE

Fizan è alla ricerca costante per migliorare l'ergonomia delle impugnature. Per questo vengono utilizzati i migliori materiali, leggeri e confortevoli.

GRIPS

Fizan is continuously searching to improve design, functionality and comfort for ergonomic grips. This is why the best materials are used, light and comfortable.

TAPPI

I tappi proteggono la punta durante il trasporto e durante l'utilizzo indoor del bastone. Fizan propone diverse varianti per forma e materiali.

TIP PROTECTOR

Tip protector protects the tip during transport and during the use of the poles indoors. Fizan offers different variations in shape and materials.

MARIO VIELMO

Alpinista italiano e guida alpina ha scalato con successo 11 vette degli ottomila. Vielmo unisce ogni avventura al desiderio di aiutare le popolazioni bisognose della regione Himalayana, raccogliendo fondi per loro. Era presente al Campo base dell'Everest nel tragico Aprile del 2015 durante il terremoto del Nepal.

Italian alpinist and mountain guide climbed 11 eight thousands summits. Vielmo joins each adventure with the desire of helping the needy population of Himalayan region, gathering funds for them. He was on Everest's Base Camp on the tragic April 2015 during the earthquake in Nepal.

BASTONE CON ANGOLO DI CORREZIONE SOTTO L'IMPUGNATURA: VANTAGGI NORDIC WALKING POLE WITH CORRECTIVE ANGLED GRIP: ADVANTAGES

DAL 1991...

BASTONI TRADIZIONALI
TRADITIONAL POLES

IMPULSE

MAGGIORE FACILITÀ DI APPRENDIMENTO

Per i neofiti risulta più facile completare il movimento delle braccia anche senza avere l'abitudine, nella fase finale di spinta, all'apertura della mano. Facilitando così l'apprendimento della tecnica corretta.

QUICK AND EASY TO LEARN

The angled grip allows your arm to extend completely making the Nordic Walking technique easy to learn.

USO PIÙ INTENSO DELLA MUSCOLATURA

L'inclinazione dell'impugnatura consente di accentuare l'impegno muscolare aumentando i tempi di durata per tutto il gesto tecnico.

GREATER USE OF MUSCLES

Make the most of your training session. The angled grip results in a greater use of your muscles and a better workout.

PRESA PIÙ IMMEDIATA SUL TERRENO

La maggior inclinazione della manopola permette di mantenere il bastoncino più in verticale. Questo consente automaticamente un appoggio più avanti rispetto al bastone tradizionale.

BE FASTER WITH BETTER GRIP

The angled grip helps keep the pole in a more vertical position resulting in greater comfort and performance over traditional poles.

MINOR UTILIZZO DEI POLSI

La migliorata capacità di recupero del bastone e l'appoggio avanzato comportano una minor rotazione del polso. In questo modo si ottiene una posizione più ergonomica ed naturale.

LESS WRIST USE

With a more ergonomic grip angle the pole contacts with the ground earlier resulting in less wrist rotation and greater comfort.

MAGGIORE SPINTA NELLA FASE INIZIALE

Il grado di inclinazione della manopola permette un incremento della componente orizzontale del vettore forza e quindi un incremento della spinta in avanti.

MORE THRUST IN THE STARTING PHASE

The degree of handle inclination allows an increase of the horizontal component of the force vector, resulting in greater forward thrust.

CARBON PRO IMPULSE ART. S21 CA10

- Alu 7075 / Carbon 80
- 97-110 cm
107-120 cm
117-130 cm

NORDIC WALKING

ALLUMINIO & CARBONIO

Fizan utilizza solo materia prima pregiata e di alta qualità. Le due leghe di alluminio (7001-7075) vengono fornite solo da partner certificati. Il Carbonio utilizzato nei bastoni garantisce leggerezza e ottima resistenza.

ALUMINUM & CARBON

Fizan uses only high quality raw materials. The two aluminum alloys (7001-7075) are supplied only by certified partners. The Carbon used in the pole shafts provides lightness and rigidity.

SISTEMA DI BLOCCAGGIO ESTERNO

Il sistema di bloccaggio Lever è molto intuitivo ed offre un'alta tenuta grazie alla chiusura in alluminio. Le sue dimensioni ridotte mantengono un ottimo bilanciamento del bastone durante il trekking.

EXTERNAL LOCKING SYSTEM

The Lever locking system is very intuitive and offers safe and secure tightness thanks to aluminium closer. The reduced dimensions keeps a perfect balance of the pole during all aspects of trekking.

MANOPOLA E PASSAMANO

La manopola per il nordic walking è stata studiata nella sua forma e nei materiali per essere leggera ed ergonomica. Il passamano è stato realizzato con materiali traspiranti e confortevoli per un sistema innovativo, ideato da Fizan. Questo sistema permette attraverso una piccola pressione sul pulsante in-out, posto sulla testa della manopola, di sfilare il passamano molto velocemente. Il sistema non crea vibrazioni durante l'utilizzo. Per rendere il passamano ancora più funzionale è stato aggiunto un'inserito riflettente per maggior sicurezza al buio.

HANDLE AND STRAP

The Nordic walking grip has been designed in its shape and materials to be light and ergonomic. The strap was made with breathable and comfortable materials for an innovative system, patented by Fizan. This system allows, through a small pressure on the in-out button, located on the top of the grip, to remove the strap very quickly. The system does not create vibrations during use. To make the strap even more functional, a reflective insert has been added for greater safety in the dark.

MISURE LASER

Fizan è l'unico produttore ad utilizzare il laser per segnare la regolazione delle misure nel bastone telescopico. Questo processo garantisce una resistenza illimitata durante l'utilizzo.

LASER SIZING MARKS

Fizan is the only producer to use the laser to mark the setting of the measurements in the telescopic poles. This process guarantees unlimited resistance during use.

SISTEMA DI BLOCCAGGIO INTERNO

Il sistema di bloccaggio Flexy mantiene un bilanciamento ottimale del bastone. Il perno in alluminio ed il suo espansore Delrin (by Dupont) garantiscono una tenuta superiore ai 100 kg.

INTERNAL LOCKING SYSTEM

The Flexy inner locking system is made with an aluminum pin and Delrin (Dupont material) expander. This assures a safe and constant tightness of more than 100kg (220 pounds) during use.

DESIGN

Fizan per realizzare la grafica nei suoi bastoni utilizza o la tecnica della sublimazione o la tecnica della serigrafia. Le grafiche vengono effettuate da uno studio grafico interno nell'azienda.

DESIGN

Fizan uses the sublimation or screen printing technique to create the graphics in his poles. The graphics are made by an internal graphic studio in the company.

PUNTA

Per una camminata classica di nordic walking Fizan propone la punta in metallo duro. Per i più esperti invece, propone la punta "Race", anch'essa in metallo duro.

TIP

For a classic nordic walking walk Fizan offers carbide tip. For the more experienced, instead, he proposes the "Race" tip, in carbide.

TAPPI

Fizan propone due varianti di tappi, disponibili anche con inserto metallico all'interno, per avere più durabilità del tempo. Nordic rubber tip e race rubber.

TIP PROTECTOR

Fizan offers two variants of tips, also available with a metal ring inside, to have more durability of the time Nordic rubber tip and race rubber.

TASCHE ESTERNE
Lo zaino ha una capienza di 20 lt. Le tasche esterne sono 4, due laterali e due frontali, che permettono di ampliare il volume dello zaino. Le tasche sono dotate di zip ergonomiche resistenti e affidabili.

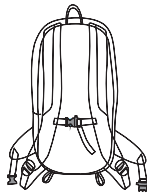

SISTEMA PORTABASTONI
Sono presenti delle asole esterne sulla parte bassa dello zaino, che vengono utilizzate per inserire la punta del bastone, che viene successivamente bloccato con dei comodi elastici posti sulla parte superiore.

SPALLINE
Rivestite con un tessuto a rete traspirante, morbido che dona confort a chi indossa lo zaino. Le cinghie sono facili da regolare, grazie ad delle asole inserite all'estremità di esse.

SCHIENALE
Lo schienale è rivestito con un tessuto reticolato traspirante e morbido, perfettamente adattabile ad qualsiasi anatomia donando comfort a chi indossa lo zaino. La cintura integrata sui fianchi si adatta perfettamente alle anche ed alla vita, per ottimizzare il sostegno del carico.

AGGANCIO CON FISCHIETTO
Le fibbie esterne sono modellate con la forma di un fischiotto, estremamente utile nelle situazioni di pericolo.

COPRI ZAINO PER PIOGGIA
All'interno di una tasca sottostante è stato inserito un coprizaino per proteggere lo zaino in caso di pioggia.

ZAINO active 10
É dotato di spalline imbottite e di una cintura con clip. Il suo colore sgargiante e gli inserti porta-bastoni riflettenti lo rendono visibile in situazioni di scarsa visibilità. Nel caso di pioggia, dalla zip inferiore si può estrarre un comodo copri-zaino impermeabile.

EXTERNAL POCKETS
The backpack has a capacity of 20 liters. with four external pockets, two on the front and two on the sides. This adds extra volume to the backpack. The pockets have ergonomic, resistant and reliable zippers.

POLES HOLDER SYSTEM
There are external slots on the lower part of the backpack, which are used to insert the tip of the pole, which is subsequently held in place with a comfortable elastic bands on the upper part.

SHOULDER PADS
Covered with a breathable and soft mesh fabric that gives comfort to person wearing it. The straps are easy to find and adjust even when the backpack is worn.

BACK
The back is covered with a breathable and soft reticulated fabric, perfectly adaptable to any anatomy and to giving comfort to the person wearing it. The belt integrated on the hips adapts perfectly to the hips and waist, to optimize load support.

HOOK WITH WHISTLE
The external buckle has been designed in the shape of a usable whistle. This could become extremely useful in an emergency.

RAIN COVER
Inside one of the pockets, you'll find an elasticated waterproof cover designed to protect the backpack in case of rain.

BACKPACK active 10
Features include, padded shoulder straps and waist belt. Colour of the backpack is bright and the reflective inserts for poles make it visible in the night. Integral rain cover can be extracted from the lower zip.

WAIST BAGS

WAIST BAG BLACK
ART. 205/20 B
150 grams 39 x 15 cm

WAIST BAG YELLOW
ART. 205/20 G
150 grams 39 x 15 cm

Marsupio con porta borraccia estraibile e regolabile attraverso una cinghia. Presenza di inserti riflettenti, sui passanti e sulla tasca, per una maggior visibilità al buio. Tessuto moderno e resistente proposto in versione nera e gialla.

Waist bag with removable bottle holder and adjustable strap. Presence of reflective inserts, on the loops and on the pocket, for greater visibility in the dark. Modern and resistant fabric available in black and yellow version.

MINI WAIST BAG
ART. 207/20
60 grams 24 x 7 cm

Mini marsupio realizzato con un tessuto elastico che si espande nel momento in cui vengono inseriti gli oggetti al suo interno. Pratico, leggero e fuzionale, dotato di inserti riflettenti per maggior visibilità al buio.

Mini waist bag made with an elastic fabric that expands when the objects are inserted inside. Practical, light and functional, with reflective inserts for greater visibility in the dark.
