

FIZAN

MADE IN ITALY SINCE 1947

POLES SUMMER 2024

Domenico Fincati ha fondato Fizan nel 1947 ed è stato il primo al mondo a produrre bastoni da sci utilizzando l'alluminio. L'azienda ha le sue radici in Italia, ad un'ora da Venezia, dove la produzione 100% Made in Italy permette un controllo completo e costante su tutti i prodotti. I processi produttivi sono conformi a tutte le normative europee circa il divieto di utilizzo di sostanze dannose.

Domenico Fincati founded Fizan in 1947 and was the first in the world to produce aluminum ski poles. The company is situated in Italy, one hour from Venice, where 100% Made in Italy production is a complete and constant control over all products. The production processes comply with all European regulations regarding the prohibition of the use of harmful substances.

In un'ottica di sostenibilità Fizan non stampa più nessun catalogo, riducendo l'utilizzo della carta, per passare da un catalogo cartaceo ad uno digitale. I cataloghi sono facilmente accessibili dal nostro sito Web con un semplice clic. Notizie e aggiornamenti sono disponibili attraverso i nostri social network.

As part of the Fizan drive to be even more green, we will no longer produce a printed catalogue. This has been replaced with a digital catalogue which is easily accessible from our web site by a simple click. News and updates will be available through our social networks.

Fizan riduce l'impatto ambientale con imballaggi 100% riciclabili, e composti da materiale proveniente da foreste gestite in maniera responsabile e sostenibile. Gli inchiostri utilizzati sono a base d'acqua (non tossici). Ogni singolo articolo prodotto è facilmente smaltibile per essere riciclato.

Fizan reduces the environmental impact with 100% recyclable packaging, and composed of material from forests managed in a responsible and sustainable way. The inks used are water based (non-toxic). Every single item produced is easily disposable for recycling.

Da più di 10 anni Fizan ha investito nell'impianto fotovoltaico diventando così, autosufficiente per circa il 60% del proprio fabbisogno ed evitando l'emissione annua di circa 25.000 kg di CO₂.

For almost 10 years Fizan has invested in the photovoltaic system thus becoming self-sufficient for about 60% of its needs and avoiding the annual emission of around 25.000 kg of CO₂.

ALLUMINIO

Fizan utilizza solamente le due migliori leghe nel mercato: 7001 e 7075. Questi due materiali ci permettono di poter lavorare con spessori sottili ma resistenti.

ALUMINUM

Fizan uses only the two best alloys on the market: 7001 and 7075. These two materials allow us to work with thin but resistant thicknesses.

MARIO VIELMO

Alpinista italiano e guida alpina ha scalato con successo 12 vette degli ottomila. Vielmo unisce ogni avventura al desiderio di aiutare le popolazioni bisognose della regione Himalayana, raccogliendo fondi per loro. Era presente al Campo base dell'Everest nel tragico Aprile del 2015 durante il terremoto del Nepal.

Italian alpinist and mountain guide climbed 12 eight thousands summits. Vielmo joins each adventure with the desire of helping the needy population of Himalayan region, gathering funds for them. He was on Everest's Base Camp on the tragic April 2015 during the earthquake in Nepal.

ONE TOUCH LOCKING SYSTEM

Il sistema OTP - One Touch Locking System è un innovativo sistema di bloccaggio per bastoni pieghevoli che permette l'apertura e la chiusura del bastone in maniera molto rapida (Rapid Fizan Pole).

Una volta tolto l'elastico, infatti, il bastone si aprirà e si bloccherà da solo (figura qui sotto).

ONE TOUCH LOCKING SYSTEM

The OTP - One Touch Locking System is an innovative locking system for folding poles which allows very Rapid Opening/Closing (Rapid Fizan Pole).

Once took away the elastic string, Pole will be opened and blocked automatically (see below design).

SUPERFICIE

Tutto il bastone è prodotto in lega di Alluminio 7075 con una finitura superficiale anodizzata nera, che garantisce una durata maggiore agli agenti atmosferici e ad un utilizzo estremo.

SURFACE

Whole Pole is made in 7075 Aluminum Alloy with black matt anodizing which assures a longer duration, protecting the pole by atmospheric agents and by extreme utilization.

CONFEZIONE

In dotazione viene fornita una comoda sacca dove riporre i bastoni dopo l'utilizzo. Al suo interno, anche il sacchetto con gli accessori ed il manuale di istruzioni Fizan per una corretta manutenzione e utilizzo.

PACKAGING

RFP includes a comfortable cover bag for the poles after the utilization. Inside the bag there is a small polybag with accessories and the instruction manual for a correct use and maintenance of the poles.

IMPUGNATURA

RFP viene offerto con 3 impugnature diverse in modo da poter essere utilizzato per touring, trekking, trail running e nordic walking.

GRIP

RFP has been offered with 3 different handles for best use for touring, trekking, trail running e nordic walking.

BLOCCAGGIO CON LEVA IN ALLUMINIO

Il bastone si regola attraverso un comodo sistema a leva in alluminio che permette di scegliere la lunghezza desiderata del bastone.

LEVER LOCKING SYSTEM

Pole adjustment is made by a comfortable Lever Locking System (Aluminium Lever) which allows to choose easily the requested length.

BASTONE CON ANGOLO DI CORREZIONE SOTTO L'IMPUGNATURA: VANTAGGI
NORDIC WALKING POLE WITH CORRECTIVE ANGLED GRIP: ADVANTAGES

BASTONI TRADIZIONALI
TRADITIONAL POLES

IMPULSE

il bastone IMPULSE viene utilizzato circa 3 cm più corto del bastone tradizionale
IMPULSE poles should be used about 3 cm shorter than traditional straight poles!

**MAGGIORE FACILITÀ
DI APPRENDIMENTO**

Per i neofiti risulta più facile completare il movimento delle braccia anche senza avere l'abitudine, nella fase finale di spinta, all'apertura della mano. Facilitando così l'apprendimento della tecnica corretta.

QUICK AND EASY TO LEARN

The angled grip allows your arm to extend completely making the Nordic Walking technique easy to learn.

PRESA PIÙ IMMEDIATA SUL TERRENO

La maggior inclinazione della manopola permette di mantenere il bastoncino più in verticale. Questo consente automaticamente un appoggio più avanti rispetto al bastone tradizionale.

BE FASTER WITH BETTER GRIP

The angled grip helps keep the pole in a more vertical position resulting in greater comfort and performance over traditional poles.

**USO PIÙ INTENSO
DELLA MUSCOLATURA**

L'inclinazione dell'impugnatura consente di accenutare l'impegno muscolare aumentando i tempi di durata per tutto il gesto tecnico.

GREATER USE OF MUSCLES

Make the most of your training session. The angled grip results in a greater use of your muscles and a better workout.

NORDIC WALKING

NORDIC WALKING

MANOPOLA E PASSAMANO
La manopola per il nordic walking è stata studiata nella sua forma e nei materiali per essere leggera ed ergonomica. Il passamano è stato realizzato con materiali traspiranti e confortevoli per un sistema innovativo, ideato da Fizan.

HANDLE AND STRAP
The Nordic walking grip has been designed in its shape and materials to be light and ergonomic. The strap was made with breathable and comfortable materials for an innovative system, patented by Fizan.

Il sistema permette attraverso una piccola pressione sul pulsante in-out, posto sulla testa della manopola, di sfilare il passamano molto velocemente. Il sistema non crea vibrazioni durante l'utilizzo. Per rendere il passamano ancora più funzionale è stato aggiunto un'inserto riflettente per maggior sicurezza al buio.

This system allows, through a small pressure on the in-out button, located on the top of the grip, to remove the strap very quickly. The system does not create vibrations during use. To make the strap even more functional, a reflective insert has been added for greater safety in the dark.

ALLUMINIO & CARBONIO
Fizan utilizza solo materia prima pregiata e di alta qualità. Le due leghe di alluminio (7001-7075) vengono fornite solo da partner certificati. Il Carbonio utilizzato nei bastoni garantisce leggerezza e ottima resistenza.

ALUMINUM & CARBON
Fizan uses only high quality raw materials. The two aluminum alloys (7001-7075) are supplied only by certified partners. The Carbon used in the pole shafts provide lightness and rigidity.

MISURE LASER

Fizan è l'unico produttore ad utilizzare il laser per segnare la regolazione delle misure nel bastone telescopico. Questo processo è stato realizzato con materiali traspiranti e confortevoli per un sistema innovativo, ideato da Fizan.

LASER SIZING MARKS

Fizan is the only producer to use the laser to mark the setting of the measurements in the telescopic poles. This process guarantees unlimited resistance during use.

SISTEMA DI BLOCCAGGIO INTERNO

Il sistema di bloccaggio Flexy mantiene un bilanciamento ottimale del bastone. Il perno in alluminio ed il suo espansore Delrin (by Dupont) garantiscono una tenuta superiore ai 100 kg.

INTERNAL LOCKING SYSTEM

The Flexy inner locking system is made with an aluminum pin and Delrin (Dupont material) expander. This assures a safe and constant tightness of more than 100kg (220 pounds) during use.

FLEXY SYSTEM

DESIGN

Fizan per realizzare la grafica nel suoi bastoni utilizza o la tecnica della sublimazione o la tecnica della serigrafia. Le grafiche vengono effettuate da uno studio grafico interno nell'azienda.

DESIGN

Fizan uses the sublimation or screen printing technique to create the graphics in his poles. The graphics are made by an internal graphic studio in the company.

PUNTA

Per una camminata classica di nordic walking Fizan propone la punta in metallo duro. Per i più esperti invece, propone la punta "Race", anch'essa in metallo duro. Per la versione Junior consiglia la punta in acciaio.

TIP

For a classic nordic walking walk Fizan offers carbide tip. For the more experienced, instead, he proposes the "Race" tip, in carbide. For the Junior poles recommends the steel tip..

TAPPI

Fizan propone due varianti di tappi, disponibili anche con inserto metallico all'interno, per avere più durata del tempo. Nordic rubber tip e race rubber.

TIP PROTECTOR

Fizan offers two variants of tips, also available with a metal ring inside, to have more durability of the time Nordic rubber tip and race rubber.

MULTI SCARVES

Gli scaldacollo Fizan sono perfetti per qualsiasi utilizzo e possono essere indossati in diversi modi! Sono realizzati in tessuto tubolare di microfibra di alta qualità senza cuciture, elastico e morbido al tatto. Il particolare sistema Microfresh favorisce la termoregolazione sia in estate che in inverno. Il tessuto in poliestere e gli inchiostri utilizzati, sono forniti solo da partner certificati. Garantiscono una protezione UPF 50+. Lavare a mano o in lavatrice in acqua tiepida con sapone neutro. Fizan riduce l'impatto ambientale con imballaggi 100% reciclabili, e composti da materiale proveniente da foreste gestite in maniera responsabile e sostenibile. Ogni singolo articolo prodotto è facilmente smaltibile per essere riciclato.

Fizan neck warmers are perfect for any use and can be worn in different ways! They are made of high quality seamless microfibre tubular fabric, elastic and soft to the touch. The particular Microfresh system promotes thermoregulation both in summer and in winter. The polyester fabric and the inks used are supplied only by certified partners. Fizan multiscarfs provide UPF 50+ protection. Hand wash or machine wash in warm water using mild soap. Fizan reduces the environmental impact with 100% recyclable packaging, and composed of material from forests managed in a responsible and sustainable way. Every single item produced is easily disposable for recycling.
