FIZZAN

MADE IN ITALY SINCE 1947

Domenico Fincati ha fondato Fizan nel 1947 ed è stato il primo al mondo a produrre bastoni da sci utilizzando l'alluminio. L'azienda è collocata in Veneto, infatti la produzione principale di tutti i bastoni è Italiana, made in Italy, permettendo un controllo completo e costante su tutti i processi produttivi e sul prodotto finale. Nel 2011 Fizan ha investito nell'impianto fotovoltaico diventando così, autosufficiente per circa il 60% del proprio fabbisogno ed evitando l'emissione annua di circa 25.000 kg di CO2. La propria produzione è conforme a tutte le normative europee circa il divieto di utilizzo di sostanze dannose.

Domenico Fincati founded Fizan in 1947 and was the first in the world to produce ski poles using aluminum. The company is located in Veneto, in fact the main production of all the sticks is Italian, made in Italy, allowing a complete and constant control over all production processes and the final product. In 2011 Fizan invested in the photovoltaic system thus becoming self-sufficient for about 60% of its needs and avoiding the annual emission of about 25,000 kg of CO2. Its production complies with all European regulations regarding the prohibition of the use of harmful substances.

Gli scaldacollo Fizan sono realizzati in tessuto tubolare di microfibra di alta qualità senza cuciture, elastico e morbido al tatto. Il particolare sistema Microfresh favorisce la termoregolazione sia in estate che in inverno. Il tessuto in poliestere e gli inchiostri utilizzati, sono forniti solo da partner certificati. Garantiscono una protezione UPF 50+. Lavare a mano o in lavatrice in acqua tiepida con sapone neutro.

The Fizan multiscarves are made of high quality seamless microfibre tubular fabric, elastic and soft to the touch. The particular Microfresh system promotes thermoregulation both in summer and in winter. The polyester fabric and the inks used are supplied only by certified partners. Fizan multiscarves provide UPF 50+ protection. Hand wash or machine wash in warm water using mild soap.

Fizan riduce l'impatto ambientale con imballaggi 100% riciclabili, e composti da materiale proveniente da foreste gestite in maniera responsabile e sostenibile. Ogni singolo articolo prodotto è facilmente smaltibile per essere riciclato.

Fizan reduces the environmental impact with 100% recyclable packaging, and composed of material from forests managed in a responsible and sustainable way. Every single item produced is easily disposable for recycling.

Il design degli scaldacollo viene realizzato dal nostro ufficio grafico studiando attentamente le tendenze dell'ambiente sportivo.

The design of the multiscarves is carried out by our graphic design office, carefully studying the trends in the sports environment.

La stampa viene realizzata con plotter sublimatici dall'alta risoluzione e con l'utilizzo di inchiostri non tossici, ad base d'acqua.

Printing is performed with high resolution plotters and with the use of non-toxic inks, water base.

Dopo aver termofissato il tessuto per evitare pieghe o imperfezioni, le carte stampate vengono sublimate sugli scaldacollo tramite una calandra di ultima generazione.

After thermofixing the fabric to avoid creases or imperfections, the printed papers are sublimated on the multiscarves by means of a latest generation calender.

Dopo il processo grafico, gli scaldacollo vengono tagliati e confezionati pezzo per pezzo controllando che la qualità sia conforme ai più alti standard.

After the graphic process, the multiscarves are cut and packaged piece by piece, checking that the quality meets the highest standards.

WINTER MULTI SCARVES

I nostri scaldacollo invernali sono realizzati in tessuto tubolare, di microfibra di alta qualità e all'interno vengono rivestiti con un **morbido strato in pile**. Il sistema Microfresh favorisce la termoregolazione sia in estate che in inverno. Il tessuto in poliestere e gli inchiostri utilizzati sono forniti da partner certificati, e sono a base d'acqua e non tossici. Gli scaldacollo vanno lavati a mano o in lavatrice in acqua tiepida con sapone neutro. I nostri packaging sono 100% riciclabili e provenienti da foreste gestite in maniera responsabile e ecosostenibile.

Our wintermulti scarves are made of tubular fabric, of high quality microfiber and inside are lined with a **soft fleece** layer. The Microfresh system favors thermoregulation in both summer and winter. The polyester fabric and inks used are supplied by certified partners, and are water-based and non-toxic. The neck warmers should be washed by hand or in the washing machine in warm water with neutral soap. Our packaging is 100% recyclable and from forests managed in a responsible and eco-sustainable way.
